

SARAN RAJ SARAVANAN

Java Full Stack Developer | Spring Boot | React.js | Python Automation
Dindigul, India | ssaranraj15102021@gmail.com | +91 75488 62252 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Java Full Stack Developer with 1.5+ years of experience building scalable web applications using Spring Boot, React.js, and REST APIs, backed by a strong foundation in incident management, Root Cause Analysis, and Python-based automation. Skilled in improving system reliability and performance through DevOps collaboration and hands-on deployment experience on AWS and Microsoft Azure.

CORE SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript

Backend: Spring Boot, Spring Security, REST APIs, Microservices, FastAPI

Frontend: React.js, Angular, HTML5, CSS3

Databases: MySQL, SQLAlchemy

Cloud Platforms: AWS, Microsoft Azure

Tools & Practices: Git, Kibana, GitHub Copilot, Incident Management, Root Cause Analysis, Agile

PROFESSIONAL EXPERIENCE

Analyst | Fortune 500 US-based Multinational Telecommunications & Media Conglomerate

Capgemini, Chennai, India

July 2024 – April 2026

- Resolved 10+ production incidents monthly through detailed Root Cause Analysis, improving system uptime and reducing recurring issues in an enterprise Agile environment.
- Developed Python automation scripts and a FastAPI-based issue identification feature, streamlining SOPs and monitoring/debugging workflows, cutting manual effort by 70% and accelerating resolution time.
- Designed cross-domain triage rules based on historical incident patterns, enabling initial issue detection before ticket creation and reducing team triage effort by 70%.
- Automated root-cause investigation and ticket creation using Kibana, GitHub Copilot, and AI tools, cutting manual triage by 50% and resolution time by 80%.

PROJECTS

Event Booking System | Spring Boot, Spring Security, MySQL, React, JWT | [Backend](#) | [Frontend](#)

- Built a full-stack event booking platform using Spring Boot 3, Spring Security, and MySQL, implementing JWT-based authentication and role-based access control to secure User/Admin workflows.
- Developed 14+ REST endpoints across auth, listings, bookings, and admin modules, integrated with a React 19 + Vite frontend via Axios, enabling event discovery, calendar view, and admin CRUD operations.

Dev Tools | Angular, TypeScript, RxJS, SCSS | [GitHub](#) | [Live Demo](#)

- Built a responsive, client-side Angular 20 application with standalone components and lazy-loaded routes, featuring a searchable developer cheat sheet covering Java, Spring Boot, Python, FastAPI, Git, SQL, and more.
- Implemented a JSON formatter (prettify/minify/validate) and a Base64 encoder/decoder with Unicode support, using RxJS and SCSS-based theming with persisted light/dark mode — entirely in-browser with no backend dependency.

CERTIFICATIONS & TRAINING

- Microsoft Azure AI Fundamentals (AI-900)
- GitHub Copilot Training

EDUCATION

Master of Business Administration (M.B.A.) – Systems Management (Online, Part-time)

Bharathidasan University, India | 2023–2026

Bachelor of Engineering (B.E.) – Civil Engineering

Mepco Schlenk Engineering College, India | 2019–2023
